

Meritor Part

Meritor Parts - The Meritor Company is a premier global supplier built upon one hundred years of tradition of quality and service. Meritor specializes in integrated systems along with a range of modules and components to the original machinery makers and aftermarket equipment in the transportation and industrial sectors.

Meritor values the needs of their clients to guarantee their success while priding itself in the company's unique energy and believes this output of energy to be their aggressive advantage in their international operations. Meritor begins with a tradition which values diversity of people and their broad thought processes. Operating in 19 nations and employing over 11,200 people, Meritor encourages innovation and collaboration among a team of experienced experts.

Meritor strongly believes in just hiring future focused individuals. These top-caliber people could quickly adapt to changing environments and freely exhibit the level of commitment and performance needed in order to attain results for the competitive market environment. The business empowers their teams to make sound business decisions in order to improve the overall success of the company. In return, Meritor offers their workers different chances for personal and professional development.

The Advanced Engineering team is on the forefront of systems engineering and components. This consists of drivelines, axles, braking and suspension systems for medium and heavy duty trucks, buses, military vehicles, trailers and off-highway vehicles. The Meritor Advanced Engineering team is growing. They opened a new technical center in Bangalore, India in September 2009 to be able to lead their advanced product development initiatives that represent the entire Asia Pacific region. This particular team is even responsible for supporting the requirements of their international engineering personnel.

The Quality team at Meritor is a dynamic and customer-focused group which is devoted to ensuring optimum development at their aftermarket distribution facilities and production plant which are situated on 5 continents and in 19 nations.

The supplier development network is specifically situated to be able to support new business development. Regional teams are supported by international initiatives, quality systems and centralized specialties in Six Sigma and Materials Engineering. Meritor's growing Six Sigma program encourages a data-driven, fact-based method to decision making within each part of the trade. The DFSS or likewise known as Design for Six Sigma ensures product reliability in every region. The team is likewise comprised of transactional Green Belts who apply Six Sigma tools to business techniques and apply lean techniques.
