

Advance-Nilfisk Part

Advance-Nilfisk Parts - Imagine how long and tiresome it will be to clean-up right after a party, with no help from machines. Not too long ago, the dirt from upholstery and carpets had to be beat out of them by hand; brooms, brushes and cleaning cloths were the best cleaning products at the time.

P.A. Fisker, the man who established Nilfisk-Advance, was actually an electrical engineer who loved working with electrical motors. Starting the business in 1906, he started to produce motors to be able to drive coffee grinders, drills, fans and machine tools. Mr. Fisker's dream from the start was to own a global business advertising goods globally.

The Nilfisk C1 was a revolutionary breakthrough in the cleaning business. Mr. Fisker invented a remarkable, ground breaking vacuum cleaner which could be operated by a single person for the reason that it just weighed 17.5 kilos! This invention came in a time where other cleaning equipment were massive and needed at least 4 operators, thus, the Nilfisk C1 changed everything and developed the manner we clean forever. The brain behind these first cleaning equipment remains unparalleled. Cleaning equipment provide a brilliant solution to an existing problem; stuff get dirty and should be cleaned on a regular basis, without too much effort.

Gradually, the business Nilfisk-Advance expanded all through the years. During the the early part of the nineteen eighties the company developed fast when the business became a part of the NKT Group. With new owners on board, they concentrated on driving Nilfisk-Advance forward within the industry, trying to be an active international player in making professional cleaning machines. Nilfisk-Advance is currently located in all parts of the world due to steadily acquiring a lot of smaller companies to be able to expand their product selection and presence in new markets. They are proud to present a range of cleaning solutions to meet each requirement.
